Create Graphical User Interface

with enteliVIZ

Structure	Level	Cost	Duration
30% Theory 70% Practice	Intermediate	**$1,500** + taxes per participant	2 days (14 hours)

Objective

This training consists in creating graphic user interfaces with enteliWEB's built-in designer, enteliVIZ.

The participant will be able to create graphics for different building automation system applications.

Audience

Project managers, system engineers, product managers, after-sales or maintenance support technicians, integrators who design, install, use, diagnose or upgrade a BACnet network.

Prerequisites

- BACnet Object Handling (or former BAS software II course or ORCAview intermediate Level)
- Basic knowledge of the Windows environment
